**THE FESTIVAL**  
Red Deer headed the list with one hundred points in the Red Deer Inspectors School Festival, held in Lacombe on Tuesday, May 14th. Points were awarded on the basis of three for first, two for second and one for third. Other schools in order were Lacombe 98 points; Confluence, (Rocky) 85; Boy's, 82; Mountain Grove 19; Sylvan Lake 9; Spruceville 8; Woody Nook 8; Blindman 3; Clearwater 3; Milton 2; Estanien 2; Burnt Lake 2; Shady Nook 2; Lincoln 1; Spring Valley 1. Inspector W. J. McLean offered a cup to the rural school winning the most points at the festival. Twenty schools were represented in the finals, and well over 400 students took part. Adjudicators were: Music, Madam J. J. Duggan, and Mr. Vernon Barford, Edmonton; Education, Mrs. E. McCormack, Alton, and Dramatic, Mr. Theodore Cohen, Edmonton. Officials in charge of the Festival were: Honorary President, Mr. N. J. McLean; President, Mr. N. J. Duggan; Vice-President, Mr. N. J. Duggan; Secretary-Treasurer, Miss Eve Zeigler.

A Grand Concert in the evening featured the winners of the various classes and was enjoyed by a large audience. First and second winners were:

Chorus, Lacombe High School, (no competition).  
Rural School, Mountain Grove, Spruceville.

Town, Public School, Red Deer, Lacombe.  
Dramatics, Class E, Grades 9-12, Lacombe High School; Class A, Gr. 1, "Little Black Sambo, Confluence; Class B, Grade 2, "Snowite and the Seven Dwarfs," Confluence; Class C, "Alice in Wonderland," Red Deer; Class F, "The Merchant of Venice," Clearwater.

High School Duet: Kay Craig and Phyllis McCaugherty; Margaret Watt and Clara Saunders; Town School, Martha Sjurdal and Dorothy Holmes, Red Deer; Doris Danner and Lorna Craig, Lacombe; Rural Duet, Kathleen Gibson and Betty Gibson, Mountain Grove; Thelma and Muriel Huseby, Estanien.

Recitations: Gr. 1, Lillian Gherke, Red Deer; Marie Appleton, Sylvan Lake; Gr. 2, George Fong, Patricia Bladen, Red Deer; Gr. 3, Betty Crowder, Confluence; Gwen Strong, Red Deer; Gr. 4, John Marshall, Lucille Marshall, Lacombe; Gr. 5, Lawrence Proudfoot, Spruceville; Barbara Bunn, Red Deer; Gr. 6, Elizabeth McCullough, Lorne Stephenson, Red Deer; Gr. 7, Edna Martin, Red Deer; Eunice Stout, Spruceville; Gr. 8, Edith Knudson, Red Deer; Orin Whitney, Red Deer; Gr. 9, Betty Wilkes, Lacombe; Gwyneth Jones, Red Deer; Gr. 10, George Marshall, Vivian Taylor, Lacombe; Gr. 11, Clara Saunders, Louise Todd, Lacombe; Gr. 12, Paul Olynyk, Red Deer; first, Doris White and Esther Standinger, Red Deer; tied for second, Kindergarten, Iris Murphy; Joan Chapman, Lacombe.

Girl's Solos: Gr. 1, Carol Woods, Lacombe; Phyllis Castleman, Sylvan Lake; 2, Patricia Bladen, Red Deer; Ivy Wilson, Shady Nook; 3, Mary Sharpe, Confluence; Marion Parker, Mt. Grove; 4, Sybil Askin, Red Deer; Grace Lamb, Lacombe; 5, Margaret Farr, Red Deer; Gladys Thompson, Lacombe; 6, Audrey Townsend, Red Deer; Francis Nole, Confluence; 7, Martha Sjurdal, Helen Askin, Red Deer; 8, Edith Knudson, Red Deer; Doris Danner, Lacombe; 9-10, Aileen Rogers, Red Deer; Margaret Watt, Lacombe; 11-12, Kay Craig, Phyllis McCaugherty, Lacombe.

Boy's Solos: 1, Ian Gibson, Mt. Grove; Charles Streech, Red Deer; 2, Dick Moyes, Billy Kitching, Red Deer; 3-4, Gordon Nile, Bill Findlater, Confluence; 5-6, Lawrence Proudfoot, Spruceville, Donald Yuill, Red Deer; 7-8, Victor Wright, Lacombe, Keith Maynes, Red Deer.

**SOMETHING FOR NOTHING**

Having nothing to suggest on their own account to effect a more suitable distribution of super-abundant wealth, and contemptuous of every plan and "ism" suggested by anybody else to that end, our apostles of tightening belts, money sanctity, and universal employment as non-content jobs, have fallen back on the hoary philosophical delusion that "One cannot get something for nothing."

In parliament and on the platform, in after-dinner speeches and newspaper interviews, field marshals of finance, capitalists of industry, and public representatives, unabashedly proclaim this ancient and obvious falsehood as though it were a truism scarcely worthy of the Gospel.

Tell it to the controllers of money, who erect it at will, and thereby create and destroy the value of property, that they get "something for nothing." They have millions of legal tender certificates to prove they do accomplish exactly that supposedly impossible feat.

Tell the bucket brigade, who have attained fortunes by pouring water into stock issues and selling the diluted securities to the trustful public, that they cannot get "something for nothing."

Tell it to the man who lent cheap dollars and is collecting dear dollars in return for them.

Tell it to the monopolist who depressed the price of raw material below production cost while building up the finished article to the consumer.

Tell it to the sweat-shop operator who has grown wealthy by robbing his employees at one end of the business and his customers at the other. A small but very conspicuous minority of the people of Canada have first-hand evidence, in the shape of stocks and bonds, savings accounts and palatial homes, great establishments and steam yachts, to prove that getting "something" is not only a possible but a highly profitable occupation.

And since two persons cannot own the same thing, and what one takes wrongfully another must lose, the mass of the population, have to content themselves at times with getting literally nothing for something. Ask the debtor, who is trying to get the debt adjusted, authority to write off some of his unpayable debts, where the "something" came from that someone else got for nothing. Ask the town man, whose home is not worth the taxes piled up against it, who has supplied the something gathered in by others for nothing. Ask the two million victims of unemployment in Canada whether somebody has not been getting "something for nothing," and who is suffering the consequences.

There has been no more amusing and no more dangerous exhibition of brazen effrontery through all these years of depression than is afforded when manipulators of money and political die-hards got up to tell the public: "One cannot get something for nothing." The one fitting and adequate response is a two-word expression, not very elegant but very expressive of complete disillusionment: "Oh, yes!"

**ALBERTA ELECTION DATE STILL UNKNOWN**

Alberta electors, in the throes of a political campaign embracing the old-line party divisions and the new-born "Social Credit" cry, still do not know when they go to the polls.

Late June or early July appear the best guesses thus far but even the date of the United Farmers of Alberta caucus is not yet decided and it is from this meeting will come the election date announcement.

Election noted: The New Brunswick general election is called for June 27. This date has been rumored for the Alberta poll battle but in recent weeks an early July date has been favored.

Feeder Pigs wanted. A. Gilmour.

**SEVEN MINISTERS SEEK RE-ELECTION**

Re-election will be sought by at least seven of Alberta's nine cabinet ministers, it appeared from a poll made Friday by the Journal.

One other, Hon. Irene Paribby, minister without portfolio, has definitely announced that she will stand for re-election. Hon. J. F. Lymburn, attorney-general, had nothing to say.

Here's the situation at a glance so far as others are concerned:

Premier Reid, nominated to stand for Vermilion.

Hon. George Roadley, away in case, but has stated he was prepared to accept nomination for Okotoks-High River.

Hon. Hugh W. Allan, will consider standing if given nomination for Grande Prairie.

Hon. J. J. McLean, willing to stand if given nomination for Taber.

Hon. Perren Baker, ready to stand but matter in hands of Olds U.F.A. organization.

Hon. J. E. Love, nominated for Sturgeon constituency.

Speaker George N. Johnston who was defeated some months ago for the U.F.A. nomination in Connaught riding, which he represents in the house, gave an emphatic "No" when asked if he might run in some other constituency.

O. L. McPherson, U.F.A., member for Little Bow and former minister of public works, has not made known his intention but it is expected that he will stand for re-nomination.

**GOOD USED CARS AND TRUCKS**

We draw your attention to the list of used Passenger Cars and Trucks which appears on another page. These cars and trucks may be seen at Laird Motors Garage on Nanion Street, Lacombe. All of automobiles have been thoroughly overhauled and reconditioned and are in first class working order.

Most of the passenger cars have been repainted and look as good as when new. Laird Motor's guarantee goes with each car, which secures the purchaser of miles of trouble-free transportation. If you contemplate buying a used car or truck it will pay you to visit Laird Motors' and look over the cars they have to offer. If you find it inconvenient to visit the garage, just phone them and they will call on you. When in town make it a point to visit their up-to-date garage and if you wish to try-out one of their used cars, you are at liberty to do so and are under no obligation to buy. Drop around to Laird Motors and see these used cars and trucks for yourself.

On Friday morning Mr. W. H. Hainsworth, a Doncaster soldier, visited the Doncaster House and identified the writing in the diary—Robert Hainsworth—as that of his brother Mr. Robert Hainsworth, farmer, Lacombe, Alberta.

Mr. Hainsworth told a "Gazette" representative: "I recognized my brother's handwriting at once. He was in Canada before the war, and joined the C.M.R. and came over to England. His company was drafted into the Post Office Rifles, and Robert was severely wounded early in 1917 (the date of the diary)."

"He was so badly wounded that, I

**WAR DIARY RETURNED**

Doncaster, Eng. "Gazette"—An incident in the Great War when a British soldier, badly wounded and believing himself to be dying, handed his diary to a German soldier with the request to send it to his people in Doncaster, has had a happy ending—eighteen years afterwards.

The German kept the diary until recently when he met Private Lacey, a British soldier on duty in the Saar during the recent publicity. The German, believing the owner of the diary had died, gave the diary to Private Lacey, asking him to try and trace the parents.

Inquiries in Doncaster revealed the fact that the owner of the diary is Mr. Robert Hainsworth, the third son of Mr. J. W. Hainsworth, a former Doncaster bank manager, living in retirement with his wife at Dikey.

Mr. Robert Hainsworth, who was badly wounded during the war, as living with his wife and two children in Lacombe, Alberta, Canada.

The diary came into the possession of the Mayor of Doncaster, (Councillor H. H. Bone) on Thursday morning, when he received a registered letter from Private Lacey, 1st Essex Regiment, Hooge Lines, Caterick Camp, Yorkshire.

The letter stated: "While being stationed on the Saar I was given a diary by a German ex-soldier. It was his wish that it be returned to his people. He took it from him (the Doncaster soldier) as he was dying, and he told me that the stains on the diary were blood from his fatal wound."

"As I do not come from Doncaster and I have no reason for going there I thought that you would favour me by getting this diary returned to his people (if any) for me, as it will no doubt mean a lot to them. I enclose diary and address of the German ex-soldier."

The diary was small and is entitled "Soldier's Own-Note Book and Diary for 1917."

The name of the owner was written faintly in pencil: "Robert Hainsworth, Corps, 2nd C.M.R.'s, Section 269-5." It was dated January 1st, 1917.

On Friday morning Mr. W. H. Hainsworth, a Doncaster soldier, visited the Doncaster House and identified the writing in the diary—Robert Hainsworth—as that of his brother Mr. Robert Hainsworth, farmer, Lacombe, Alberta.

Mr. Hainsworth told a "Gazette" representative: "I recognized my brother's handwriting at once. He was in Canada before the war, and joined the C.M.R. and came over to England. His company was drafted into the Post Office Rifles, and Robert was severely wounded early in 1917 (the date of the diary)."

House Committee: Mrs. Boyd and Mrs. Marble.

Tournament Committee: Miss Pratt and Miss McClary.  
Two tea members are to be appointed on the Tea Committee.  
The first Bridge Tea will be held on Friday afternoon, May 18th. All those interested are requested to be present, as a business meeting will take place. Following is the draw for Friday, May 17th. The first named in each class will please telephone and make arrangements for the game. Please post your score.

Mrs. McCaugherty, Mrs. Halpin.  
Miss Morrison, Mrs. Chapman.  
Mrs. Teare, Mrs. Robson.  
Mrs. Vickerson, Dr. Hamilton.  
Mrs. Lorne, Mrs. Donald.  
Mrs. Pratt, Miss Lavery.  
Mrs. Jackson, Mrs. Boyd.  
Mrs. Moore, Miss Jagoe.  
Mrs. Hay, Mrs. Owen.  
Mrs. Gilmour, Miss Inskip.  
Mrs. Marble, Miss McClary.  
Miss Smith, Mrs. Donald.  
Miss Pratt, Miss Lavery.  
Miss Jackson, Mrs. Boyd.  
Mrs. Moore, Miss Jagoe.  
Mrs. Hay, Mrs. Owen.  
Mrs. Gilmour, Miss Inskip.  
Mrs. Marble, Miss McClary.

**TALK ON MEXICO**

J. Stafford Boyd, Manager of the Bank of Montreal, entertained members of the Young People's Society and their guests with moving pictures of Mexico where he spent a number of years. The pictures included many places of note, such as famous cathedrals, palace of Cortez, Government buildings, pyramids which have recently been uncovered and which it is believed were erected before the time of Christ, street scenes contrasting the extremes of life in the Republic, and concluded with a real picturing a bull fight.

Mrs. Boyd, and W. N. Morrison, were prominent figures in some of the pictures. Mr. Boyd's verbal description of the various scenes added to the enjoyment of the entertainment. The speaker was given a hearty vote of thanks.

**BISHOP VISITS LACOMBE**

Bishop Sherman of Calgary, was an official visitor at St. Cyprian's Church, Lacombe, on Sunday, May 13. Four young people were confirmed at the evening service and an inspiring sermon by the Bishop was listened to with interest by the large congregation. Much enjoyment was received by the music provided by a choir of young children under the leadership of Mrs. L. D. Wright.

**TO RENT**

Modern 6-roomed house; veranda, lawn, kitchen garden, well, pipeline furnace, bath-room complete. Garage. Rent \$10.00. Fraser-MacDonald.

Indications from representatives of the Canadian Pacific Railway way throughout the world are that pleasure travel this year will be on a greater scale than any time in the last two years, bringing more visitors to Canada from the United States, Europe, and the Orient, and pouring millions of dollars into Canadian pocket-books.

Western Canada is expecting a good share of this traffic and the Canadian Pacific Railway is making extensive preparations there in its hotels and bungalow camps. Dates have been arranged for special entertainments at Banff Springs Hotel, which opens on June 16 and Chateau Lake Louise, which opens on June 21.

With Banff or its sister resort, Lake Louise, as headquarters, tours can be made to such well-known places as Johnston Canyon, Moraine Lake and the Valley of the Ten Peaks, the Lakes in the Clouds, the Plain of the Six Glaciers, the Great Divide, Wapta Lake, Hungabee, Yoho Valley and bungalow camp, Takakkaw Falls, the historic Kicking Horse Pass, Mount Stephen, and the great mountains near Field, B.C.

The large Canadian Pacific railway hotel at Banff is equipped in every way for the comfort of visitors; the hot radio-active sulphur springs have been turned into a swimming pool, side by side with a pool filled with fresh water, the rolling floor of the valley has been made into a picturesque golf course; there are

**WILL CELEBRATE MAY 24**

The Committee in charge of the postponed June 24 celebration, have decided to carry out the same program as was cancelled on that day, on the 24th of May. Should the day be wet so that the children's sports cannot be held, there will be a free picture show, in the afternoon for all children in the afternoon for all children.

2:30 Children's Sports to be held on the Football grounds. All children welcome, both country and towns, come and have a good time.

Free Ice Cream. Bazaar.

4:00 Football. On the Football grounds.

6:30 Soft Ball, on the Football grounds.

9:30 Bonfire: Where a Royal Salute of 21 Rockets will be fired off.

10:15 The Siren will blow and the Lacombe Fire Brigade will turn out and put out the Bonfire.

Free Dance in Bob Park's New Garage, everybody welcome.

Card Parties at both the Adelphi and Empress Hotels, Free.

The Committee in charge are particularly anxious that everyone should have an enjoyable day that will long be remembered, so come and enjoy yourself, and let make it a real day.

Children's Sports

Boy's and Girl's Race, 5 to 7 years, 25 yards.

Boy's Race, 7 to 10 years, 50 yards

Girl's Race, 7 to 10 years, 50 yards

Boy's Race, 10 to 12 years, 50 yards

Girl's Race, 10 to 12 years, 50 yards

Boy's Race, 12 to 15 years, 100 yards

Girl's Race, 12 to 15 years, 100 yards

Married Ladies Race, 75 yards.

Paper Stack Windfall Race, 50 yds.

**WOMEN'S INSTITUTE**

A Tired Mother's and Housekeeper's holiday is being sponsored by the Women's Institute, from Tuesday, July 30th to Saturday, August 3rd, inclusive, at McLaughlin Beach, Gull Lake. Those taking advantage of this camping holiday must provide their own food and bedding and pay \$2.00 per person. All camp facilities are available for their use. The Institute will appreciate it greatly if those wishing to attend will communicate as early as possible with any one of the following committee: Mrs. A. Jenkins, Mrs. J. Sherron, Mrs. J. Graydon, Mrs. R. Saunders or Mrs. W. Clarke.

**COMMEMORATING 25 YEARS OF THEIR MAJESTIES' REIGN!**  
**ROYAL CAVALCADE**  
The great Events of the past 25 years... re-enacted by England's finest stage and screen stars!  
At The Avalon Monday and Tuesday, May 20-21

Thursday, Friday, Saturday  
The yearning for adventure that is latent in every human is given a thrilling expression in "Tarzan and His Mate," jungle film continuing the experiences of Johnny Weissmuller and Maureen O'Sullivan in Dark Africa.

Almost from the first scene there is a series of "punch" incidents to capture audience interest. Struggles between man and beast on land, in the water are blended into one of the most powerful dramas of conflict ever screened.

Weissmuller was photographed under water as he fights a crocodile to the death. Herds of elephants are shown charging a safari of several hundred natives. Man-eating lions attack white jungle explorers; herds of apes, Wandebeeste, zebras and other jungle beasts are shown in action.

The supporting cast includes such notable players as Neil Hamilton in the role of Harry Holt, that he played in the original "Tarzan, the Ape Man," and Paul Cavagnagh as a convincing "heavy." Harvey contributes his unique Cockney comedy high lights; with Doris Lloyd, William Stack, Desmond Roberts and Nathan Curry scoring in the small roles.

COMING: Wheeler and Woolsey in "Kentucky Kernels," May 23, 24 and 25.  
"Twin Man," May 30, 31, June 1.

"Royal Cavalcade," made with all the resources of England's largest motion picture producing studios to celebrate His Majesty's Silver Jubilee is a veritable triumph that more than justifies the immense amount of work involved in the production.

"Royal Cavalcade" has been described by a prominent English newspaper critic as a triumph of inspiration and patriotism and a film that demands to be shown on every screen throughout the Empire during the Jubilee celebrations in May.

Against an ever-changing background of the times the castwoks and news items, a cast composed of every big name in England's stage and screen world, re-enacts the story over a period of twenty-five years. It travels the gamut of every momentous event during the past quarter of a century.

Among its most gripping episodes are the "Titanic" disaster, the Sarajevo crime, Lord Grey's eve-of-war speech, an air raid on London, Poch's Armistice parley in a train, the signing of the Versailles peace treaty, Scott's heroic Antarctic expedition, suffragette agitation in Downing St., Lady Astor taking her seat in the house of commons, the memorable general strike and a number of other historic incidents with complete success and amazing accuracy.

This marvelous pictorialization is shown with a cartoon, travelogue and novelty reel.

## WORLD HAPPENINGS

## BRIEFLY TOLD

Two hundred varieties of slippers are being made in a new factory at Northampton, England, largely for the American trade.

A national plebiscite is planned for the spring of 1935 in Germany's re-armament and possible return to the League of Nations.

France's imperial economic condition for the first time in the nation's history has been placed on a four-monthly basis.

A meeting of all 44 Nationalist deputies in the German Reichstag at Berlin, Germany, has decided no official recognition shall be shown to the Reichstag's election.

Canadian Boy Scouts are attending a two-week summer camp at the 25th anniversary of scouting in their country has been received by the governor-general, as chief scout for Canada.

Thirteen men implicated in the recent Venzelski revolt, including M. Plotski, godson of former Premier Alexander Venzelski, were sentenced to prison terms ranging from two to 20 years. Nine were acquitted.

Great Britain is quietly mobilizing her civilian forces for defence against gas and bombing attacks; it was disclosed when Colonel E. M. Cowell, director of the British Red Cross in Surrey, appealed for 1,000 men and women for volunteer first aid during work at Croydon airport.

More than 160 fighting craft will take part in the royal jubilee naval review of Spithead, July 16. The flags of 12 admirals will be flown and the assembly will constitute the biggest peace-time demonstration of naval strength since the "test mobilization" in the same waters in July, 1914.

## Indians Win Appeal

Judgment for \$18,309 Awarded Northern Saskatchewan Band

Judgment for \$18,309 and costs was awarded members of the Mistawasis Indian band, near Leask, Saskatchewan, against the federal department of Indian affairs by Hon. Justice P. E. Angers in exchequer court, according to word received at Prince Albert.

Action for \$20,309 was based on the premises that the Indians had been improperly used by the department, contrary to the treaty of 1876. Richard Mulcaster, K.C., assisted by W. G. Elder, Prince Albert, appeared for the Indians at the trial at Prince Albert last fall. R. G. Hamilton, Regina, acted for the crown.

The successful action was based on the contention funds of the Indians were used to provide medical services, purchase stock, pay the farm instructor and for other purposes for which under the treaty, free provision by the Dominion government had been promised.

The judgment also restrains the Indian agent at Leask from farming on the reserve.

## New Honors

Women May Be Admitted To New Orders At Jubilee Celebration

It is understood a new honor order for women, or at least their admission to another of the existing orders, is under consideration in court circles in connection with the jubilee celebrations in London.

At present women may enter only the Order of the Companionship of Honor and the Order of the British Empire and Crown of India. The Companionship honor is limited to a total of 50, and the Crown of India is reserved for recognition of women's work in India, no far as women are concerned.

The Queen is the only woman holding the Order of the Garter, but in medieval times it was usual for several women members of the royal family to be included.

The Royal Victorian Order, which is bestowed in recognition of personal service to the King and members of the royal house, might possibly be enlarged to include women.

## Communists In Korea

Officials Plan To Rid Country Of All Radicals

Korea will be cleared of all radicals if plans of officials are successful. This was revealed with the recent disclosure that 200 alleged "reds" have been arrested and 47 of these indicted before the Seishin District Court. The leader is said to be Gen. Shun-ho, aged 36, who is declared to have organized a league of Communists in Korea which attempted to spread propaganda in Seishin, Kainen and Rashin districts.

He: "What will your father say when he knows we're engaged?" Girl: "Oh, he'll be delighted. He always is."

Teacher asked our young hopeful what came in like a lion and went out like a lamb and he answered: "Father."

## Mark of Distinction

## The Royal Society of Canada

The Royal Society of Canada recently elected a new president and a new vice-president.

The new president is Dr. H. C. Gunning of the Geological Survey of Canada, Ottawa, and Ralph Leslie Rutherford, associate professor of geology at the University of Alberta.

The new vice-president is Dr. H. C. Gunning of the Geological Survey of Canada, Ottawa, and Ralph Leslie Rutherford, associate professor of geology at the University of Alberta.

The new president is Dr. H. C. Gunning of the Geological Survey of Canada, Ottawa, and Ralph Leslie Rutherford, associate professor of geology at the University of Alberta.

## Medical Science Advances

## New Approach To Unravel Problem of Heart Trouble

The report was made to the Federation of American Societies for Experimental Biology by Jane Sands Robb, M.D., of Syracuse University College of Medicine.

Coronary thrombosis is a failure of the blood supply to one or more of the 13 muscles which operate the human heart. Dr. Robb's work is a method of identifying some of the specific heart muscles which go wrong.

It is an advance of a technique which physicians have been using for 30 years in analysis of the meaning of motions of the electric tracing pencil in electrocardiograms of the heart. The machine which does this was invented by Einthoven about 1900.

These motions are noticeably different in coronary thrombosis. Dr. Robb has been able to interpret the designs on the heart chart in terms of individual heart muscles. Her work shows that each muscle when injured, as in coronary thrombosis, makes a different pattern on the electrocardiogram.

The result is a further solution of the riddle of coronary thrombosis in animals' hearts and evidence that the solution will work equally well on human hearts.

The result is a further solution of the riddle of coronary thrombosis in animals' hearts and evidence that the solution will work equally well on human hearts.

The result is a further solution of the riddle of coronary thrombosis in animals' hearts and evidence that the solution will work equally well on human hearts.

## Finds Lost Treasure

## Chinese Purchases Pillow Containing Valuable Pearls

A poor Chinese in Shanghai who bought a little red satin pillow with his last coin—because he thought his wife would like it—now finds his purchase has brought him a fortune.

The lucky man, Chen Tinggrob, had borrowed a dollar from his brother-in-law when he met a destitute Russian who offered him the pillow. He knew his wife would be pleased with its marvelous embroidery.

When he reached home he was afraid to tell her how he had "wasted" the borrowed dollar. Later he laid down, with his head on the pillow, and found it was so uncomfortable that he took off its outer covering. This revealed embroidery of even greater beauty, and he went on tearing off successive coverings till he came to a ball of cotton wool.

This contained 60 pearls of great beauty and size.

Now Chen is richer by \$16,000—the sum he obtained from the pearls. The pillow is said to have been lost by the Empress Dowager Tse Hai during the Boxer rising when she fled Peking.

She subsequently offered a large reward for its return, but its whereabouts remained a mystery until Chen solved it.

She subsequently offered a large reward for its return, but its whereabouts remained a mystery until Chen solved it.

## GARDENING

## Gordon L. Smith

Longstanding Vegetable Season

It is good business to make several sowings for each vegetable. If this is not done, all the produce will be ready at the same time, and there will be a glut of a certain vegetable.

After all, with such things as radish, spinach, peas, corn or practically anything else, the time they are best eating is when they are fresh, that is, just mature, and taken right out of the garden.

They must be quickly grown and used immediately when they are the proper size. These vegetables will deteriorate whether they are left in storage or ripening in the vegetable rows. The good gardener, to avoid this, has his vegetables coming along continuously, a few feet of lettuce and baby carrots and beans ready for the table all season. It is a good plan to sow a third of the packet, a week or two ahead of the regular time, and another third a fortnight later, and the last third still later. With some things like peas which make their growth during the cool weather, two sowings can be made, one at the earliest possible moment and the other at the latest possible moment, by using early, medium and late varieties. The season can be extended up to six weeks.

# MAY SPECIALS

These Will No Doubt Interest You as  
Pre-Holiday Bargains

These Prices will be in Effect until May 25, inclusive

## Here and There

With the warm weather and  
a fine season ahead upon us,  
dates of opening of the summer  
hotels and resorts of the Canadian  
Pacific Railway will be of interest  
to tourists. Banff Springs  
Hotel opens, June 15; Château  
Lake Louise, June 21; Prince  
River Bungalow Camp, June 15;  
Devils Gap Bungalow Camp,  
June 21; Alexandra Hotel, St.  
Andrews, N.B., June 20; The  
Pines, Digby, June 27 and the  
Lakeside Inn, Yarmouth, June 28.

Portland, Oregon, famous an-  
nual Rose Festival will be held  
this year, June 6-8. Millions of  
rose bushes will be on display in  
the many fields of the grand floral  
parade and also in the  
annual show of the Portland Rose  
Society.

Marking the Silver Jubilee cele-  
brations of the coronation of King  
George V, to be held this year,  
the Canadian Pacific Railway  
has issued a strikingly handsome  
commemorative postcard. The  
subject of the function from the King's  
drive to St. Paul's Cathedral on  
May 8 and ending with the Lord  
Mayor's Show on November 9.

A beautiful new menu card for  
the King's Jubilee celebrations  
has been designed by the Cana-  
dian Pacific Railway to be used  
in all the company's hotels from  
the Atlantic and Pacific coasts  
on world cruise ships. The front  
cover is done in gold with the  
Canadian Coat of Arms in color  
at the top and the Canadian Pa-  
cific crest at the bottom. The  
back cover, also done in gold,  
shows a train in the Rockies, the  
Château Frontenac at Quebec City  
and the Empress of Britain. A  
map of the world shows the Coast  
of Arms and a space on the back  
for autographs completes the  
menu card.

The world is invited to attend  
the annual Rose Festival to be  
held at Portland, Oregon, June 6,  
7 and 8. This, one of the out-  
standing fetes of the United  
States, will this year show many  
new and beautiful features,  
among which the 47th annual  
rose show of the Portland Rose  
Society will be not the least im-  
portant. The whole city will be  
embowered in roses at that time  
of year.

Over the period May 15-28 in-  
clusive, the Canadian railways  
are offering special bargain fares  
for the summer season at one  
cent a mile from various eastern  
cities to western Canada. Return  
limit is thirty days from the date  
of issue of ticket with stopovers  
within the limit of the ticket at  
Fort Arthur, Armstrong and  
points west thereof.

Addressing an audience of more  
than a thousand representative  
business men at Toronto recent-  
ly, B. W. Healey, K.C., I.A.D.,  
chairman and president of the  
Canadian Pacific Railway, stated  
that the Canadian National Rail-  
way system was never an honest  
experiment in public ownership  
and that it was neither more nor  
less than a real accident. This  
problem, he said, constitutes Cana-  
da's most difficult problem and  
threatens national solvency.

Starting a tour of Canada which  
will include the principal cen-  
tres of the Dominion, Lord Baden-  
Powell, Chief Scout, Lady Baden-  
Powell, chief of the Girl Guides,  
and their two daughters, landed  
at Vancouver from S.S. Princess  
Charlotte recently and are being  
given rousing welcomes in every  
center throughout the country.

## SPRUCVILLE NEWS

The roads being bad last Sunday,  
the Special Mother's Day program  
has been arranged to be given at the  
Sunday School on Sunday the 19th.  
The Lacombe District Band will give  
a concert of Sacred music, with solos  
and other program. Everybody wel-  
come.

Mr. and Mrs. J. Stout and Mr.  
and Mrs. Macpherson and families of  
Acme spent last week end with Mr.  
H. and Ed Stout.

Congratulations are extended to the  
various schools in the District, win-  
ning a good share of prizes.

We welcome Mrs. O. H. Walker  
back to our Community after spend-  
ing six months with her sister at  
Cedar Rapids, Iowa.

Mr. and Mrs. Ed. Stout and fam-  
ily spent Sunday with Mr. and Mrs.  
Roy Rice.

The regular monthly meeting of the  
U.P.W.A. will be held at the home  
of Mrs. English, Wednesday after-  
noon, May 22nd. As this is a very  
important meeting, all farm women  
are urged to attend. The Roll Call  
will be answered by anything relat-  
ive to "Purchase of Peace." A  
resume of doings in the Provincial  
and Federal Houses will be given by  
Mrs. H. E. Heath. The remainder  
of the afternoon will be given over  
to a full discussion on Social Credit.

On Monday evening, May 27th the  
U.P.W.A. are holding a Special Meet-  
ing in Spruceville Hall. It is very  
strongly urged that all farmers inter-  
ested should make a point of  
attending, as very vital matters are  
due for discussion.

## HOCKEY CLUB DANCE FRIDAY, MAY 17

Remember the Hockey Club dance  
in Park's new garage on Nanton St.  
The large floor has been especially  
treated for the dance and will be as  
smooth as glass. Bob Paulsen and  
his 6-piece Dance Band will supply  
the music. The management will  
see that you have a good time, so  
turn out in crowds and have a real  
evening of dancing. Admission 35c.  
Dance starts at 9:30 sharp.

## THANK YOU

I wish, through the columns of this  
paper to express my thanks to all  
the people of Lacombe and district,  
for the support and friendship which  
has made my business and sport life  
in the town such a pleasant one.  
Sam Murray

## FAIRVIEW DOIN'S

Not much news this week. Everybody too busy. Even the birds seem to be singing "Get the crop in," "Get the crop in" except the Magpie and he sings "Get the Eggs." But with all the seed loads we have had, wheat sowing will soon be in the past. In fact is now for the majority.

Friday and Saturday of last week were days of rest for the farmer (?) or at least he could not work on the land. We met a man last Summer when it was so dry and asked how he was standing it and he said "Oh, we are all a cuss" and a cry."

How about you Friday and Saturday?

Miss Gates of Milton School was visiting at Mr. Brown's on Sunday last and also attended Church and presided at the place.

Quite a few people were at Church on Sunday to listen to the Mother's Day sermon and program. The sermon was the best yet, and the program though short, was also good.

Misses Edith Clague and Kathleen Sims sang "Tell Mother: I'll be There" and young Mr. Oulton gave a very appropriate reading. Some of our fellows who haven't been to church since you left Kentucky had better come out. Sure, there is a collection taken but you don't have to give anything unless you want to, so the Deacons are prohibited by both Church and State from carrying guns.

Mr. and Mrs. M. C. Miller, of Joffre were visiting with Mr. and Mrs. H. O. Sims on Sunday last.

Feeder Pigs wanted. A. Gilman.

## SCHOOL SPORTS DAY

Over 90 teams have been entered in the Inter-scholastic Sports Day here on Saturday. Baseball, basketball, football and football teams have been entered. Teams are being sent in from almost every school in Central Alberta. From as far away as Nordegg teams have entered to compete for the honors of the day. It is estimated that in the neighborhood of 2500 people will be here to witness these interesting sports. The big event will take place at the Exhibition Grounds and booths are being erected to handle refreshments. Arrangements for the day are perfect and all events will be run off smoothly. Both boys' and girls' teams are entered in all events and in some cases mixed teams will play. Turn out on Saturday at 9:30 and see a whole day of good clean sports.

## THE BULL SALE

The Twenty-Sixth Annual Bull Sale will be held at Lacombe Exhibition Grounds on Thursday, June 6th. Catalogues are now out and 77 purebred bulls have been listed. These comprise Hereford, Shorthorn and Aberdeen-Angus. Judging will commence at 10 a.m. and the Auction Sale will start at 1 p.m. C. F. Dameron is the Auctioneer. For any information regarding the sale, get in touch with the Secretary, D. F. Chisholm.

## GENERAL DRAYING

For teaming of every kind; gravel hauling, draying, hauling ashes, in fact any kind of team work see Roy Hoppus. Satisfaction guaranteed.

ASK FOR Kellogg's

Be sure  
you get  
Kellogg's

There are good reasons why you should insist on Kellogg's when you buy corn flakes. You can rely on their absolute purity and uniform quality. No imitation has ever matched their flavor and crispness. And no other corn flakes are protected by the heat-sealed WAXTITE inner bag, that keeps Kellogg's oven-fresh.

The red-and-green package gives you outstanding value. Many generous servings for a few cents. Kellogg's—the original Corn Flakes—are today the largest-selling ready-to-eat cereal in the world. At all grocers. Quality guaranteed. Made by Kellogg in London, Ontario.

### Builders And Wreckers

Glancing through a little trade magazine the other day the writer came across a short bit of verse entitled "Wreckers," which, in these days and times, is worthy of still wider circulation. So we reproduce it:

I watched them tearing a building down,  
A gang of men in a busy town.  
With a ho-heave-ho and a lusty yell,  
They swung a beam and the side wall fell.  
I asked the foreman, "Are these men skilled,  
And the men you'd hire if you had to build?"  
He gave a laugh and said, "No, indeed!"  
Just common labor is all I need.  
I can easily wreck in a day or two  
What builders have taken a year to do."  
I thought to myself as I went my way,  
Which of these roles have I tried to play?  
Am I a builder who works with care,  
Measuring life by the rule and square?  
Am I shaping my deeds to a well-made plan,  
Patiently doing the best I can?  
Or am I a wrecker, who walks the town,  
Content with the labor of tearing down?

All over this world of ours there are men and women earnestly striving to build—people in governments, in churches, in education, in finance, in industry, in business, statesmen around the League of Nations council table, sitting in international conferences, or engaged in diplomatic negotiations. They are trying to build anew out of the wreckage and upheaval of political, economic and social conditions thrown into chaos by the Great War and its bitter aftermath. They are striving to save civilization, and make it a finer thing than anything hitherto known.

But because the times are temporarily out of joint, weaknesses have developed in the economic system, social evils have become multiplied; in a word, because abnormal conditions exist and many people are in difficulties, the "wreckers" have become bold and wait the town blantly engaged in the easiest of all tasks—that of tearing down. Men and women who never constructed anything, who lack both the ability and the incentive to construct, are busy themselves in criticizing the efforts of the builders, imputing unworthy motives to them, seeking to wreck anything and everything of a constructive nature that is attempted.

Even the best and most patient of people are inclined to be critical and become fault-finders. In fact, how often are people now heard to speak in praise of anything, of any institution, or of any effort that is being put forth? Rather, is it not the general attitude to denounce and attack blame?

The popular thing to-day seems to be to destroy, to wreck. In some countries they are deliberately trying to destroy religion and so to revert to the dark ages; in these and other countries the attempt is being made to deprive people of liberties won through the suffering and bloodshed of past generations. The wreckers would in a day tear down the constructive work of centuries.

There are those, of course, who still hold fast to the faith that is in them; who still believe in liberty as the sacred right of the individual citizen; who hold true to democratic forms of government and trust in the people and hatred of dictatorial autocracy.

Builder or wrecker—which are you? Which class has brought mankind to its present civilization? Which class lifted mankind from the cave-man stage? Which group has developed modern medicine, which is responsible for modern inventions, which built our transportation and communication systems, our modern towns and cities, which brought into being the higher standard of life in this twentieth century? And was it not the wreckers who precipitated the Great War and are responsible for the whole train of evils which have followed?

The builders are still building in the face of enormous difficulties and the opposition of the wreckers; the builders are striving to save civilization which the wreckers would destroy through revolution and bloodshed in order that out of civilization's crash they may reap goulash benefits.

Each of us may well take stock of ourselves, study our present habits of thinking, examine our actions, watch our words—in brief, take a measure of our lives and see whether we are builders, "patiently doing the best we can," or merely wreckers "content with the labor of tearing down."

#### To Keep Informed

A representative of the Dominion government will visit Denmark soon to study operation of a peat development plant using a formula for which representatives of a British company have been seeking a subsidy for development here. This step is taken in order to keep fully informed of any new fuel development that might prove economically useful to Canada.

Our attitude toward travel by airplane is that we're not a bit afraid but are rather glad when weather conditions compel us to go by train.

#### Funds For Memorial

More than 20 countries are now enlisted in the campaign to collect funds for a Florence Nightingale memorial. It is to take the form of endowed post-graduate courses of training in nursing, to be conducted in London. The League of Red Cross Societies have financed such courses for several years, but no longer has funds for such a purpose.

The Mexican jumping bean is operated by a worm grown fat eating the interior of the seed and flipping himself about in the empty shell.

### Indian Did Not Forget

**Sends Gift To Lawyer Who Saved His Son In Trial**  
Sixteen months ago a Nainimo jury acquitted Andrew Moses, slender Port Albert Indian, of a charge of attempted murder. The charge laid after an Indian from the west coast of Vancouver Island, who had allegedly stolen Andrew's girl-wife, was stabbed through the heart and saved from death by a young Victoria surgeon.

For two days the jury listened to how Andrew had followed his pretty 18-year-old wife whom he had married according to Indian custom.

When he found her there was a fight and Charlie Sam was stabbed in the heart. Sam's life was in doubt for more than a month but he recovered eventually and Moses went on trial.

When the jury returned its verdict Chief Moses, Andrew's father, broke a two-day court room silence. "I don't forget you," he said to R. L. Maitland, K.C., his son's counsel. "I don't forget you save Andrew's life, Andrew's good boy. You won't forget me."

Recently Mr. Maitland received two eight-foot intricately carved totem poles. What each figure and character denotes he will probably never fully know, but whenever he looks at them he will know that the old chief did not forget.

### BROKE HER LEG AGAINST A STAIR

#### Whilst Hampered by Rheumatism

"Two years ago," writes a woman, "I was suffering with rheumatism in my legs, and when walking upstairs one day just kicked my right foot against the stairs, and broke my leg just below the knee. I was in hospital for four months and when I came out someone advised me to try Kruschen Salts. I did so, and now I have no trace of rheumatism. I would not be without my daily dose of Kruschen, which I take every morning—half a teaspoonful in warm water."—Mrs. P. B.

The six salts in Kruschen stimulate the liver and kidneys to healthy, regular action; assist them to get rid of the excess uric acid which is the cause of rheumatic pains. When poisonous uric acid goes with deposits of needle-point crystals—there's no doubt about those aches and pains going too!

#### Want Branch Lines

**Plan Is Made For Completion Of Two Branch Lines In Northern Saskatchewan**

A plan for completion of two branch lines of the Canadian Northern Railway in northern Saskatchewan was made before the select standing committee on railways by C. R. McIntosh (Lib. North Battleford). Mr. McIntosh was supported in his request by P. G. Davies (Cons. Athabasca).

A 150-mile branch line runs north from North Battleford, Sask. to St. Walburg, a distance of 90 miles, but the remaining 100 miles to Beaver River Crossing is unfinished. This line was projected originally to join North Battleford with Edmonton. Mr. McIntosh urged the road be completed, and estimated the cost to be not more than \$350,000.

The other line was from North Battleford to Edmonton, via Spruce Lake.

#### Motor Car Industry

**Demand For Cars In United States Puts Industry In High Gear**

The No. 1 industrial colossus of the United States, the motor car industry, is in high gear. In haul-away trucks, in freight cars and in drive-away processors the product of the assembly lines is moving from factory to dealer and on to consumer in heavier volume than at any time during the last five years.

Gaining momentum steadily under the impetus of a swelling consumer demand, the industry has assembled more than 1,513,000 passenger cars and trucks since Jan. 1. During 16 weeks of 1935, the industry produced as many units as were manufactured in all of 1932. Output for that year, lowest point in the depression, was 1,431,494 cars and trucks.

#### Winds Unearth City

**Chinese Town Buried By Flood 200 Years Ago**

Buried two centuries ago by a flood, Chuihsien, in the Honan Province of China, has just been blown to light by this winter's winds. In the reign of Chien Lung, 200 years ago, Chuihsien was a flourishing town. Then the Yellow River rose in flood, and Chuihsien was buried in mud and sand. Year after year the winds of Asia have blown over this spot, removing layer on layer of sand, and this winter the work of two centuries is complete. An unusually violent windstorm has revealed the Western Gate and a street of the lost city. The authorities intend to carry on Nature's work and complete the excavations of Chuihsien.

A baby crying for an hour uses enough potential energy to climb to the top of the Washington Monument.

**THE CHORE GIRL**

### Idea Netted Personal Fortune

**Sir Guy Standing Made Money Selling Old War Equipment**

If it had not been for the Great War, Sir Guy Standing might not have been able to take up acting as a hobby.

He is well known for the excellence of his paintings and his adventures in the British navy, for which he was knighted by the king. But he said that when the king's sword descended on his shoulders, he had but \$40 in his pocket.

Sir Guy, after the war, observed miles of United States tanks, tractors, automobiles and other equipment lined along the Rhine. He formed the Motor Organization, Ltd., set out to buy this equipment and sell it to Europe, which was trying to rehabilitate itself.

When the transaction was completed, Sir Guy discovered Britain had a like amount of leftover war material it would have to get rid of. Such competition would ruin his company, so he managed to buy this equipment as well. It took six years for the company to sell and clear its books, but the result was a large personal fortune for him.

"A fortune," he explained, "which permitted me to make acting my favorite hobby."

"But you can be sure of one thing: I'm through with my business. It leaves too many gray hairs."

Sir Guy is 60 and one of Hollywood's popular characters.

### Start Practice In Country

**Many Young Doctors In Rural Districts Of Ohio**  
The country doctor is still in the picture in Ohio.

His importance is increasing with many young physicians turning to rural districts to start practice. Dr. Russell G. Means, general chairman of the 101st anniversary celebration of Ohio State University Medical College Alumni, said:

"Several hundred of graduates who returned for the reunion were small town practitioners," he said.

Dr. Means attributed the rising interest in rural areas to economic conditions and to the fame of Dr. R. B. Dyer, who cared for the Dime quintuplets.

"Young physicians are making a great go of it in the country," he said. "They've often been able to outpace the old fellows by a mile, because they are acquainted with modern advances and are on their toes."

### Road Scout In China

**American Girl Is Being Recognized For Her Efforts**

Scouting for good roads in China is the avocation of Miss A. Viola Smith, American Commissioner at Shanghai, and she is winning recognition for her efforts. She consumes at the rate of 40 miles an hour in all directions out of Shanghai in order to convince the public that one can tour China by automobile. Her latest is a 781-mile trip to Changsha, the capital of Hunan Province, which required 10 days. She reports that the quality of road caused by Communists in the district were not borne out by the condition of the country. She saw many trucks and engineers from Shanghai working on the roads.

"Nanchang was bustling with life and reminded me of Nanking in 1928," she said. "They are building new streets 120 and 100 feet wide and covered with concrete."

### Marine Food

**Say Seaweed Contains All Of The Important Vitamins**

Down to the sea for seaweed will be man's next step in his quest for food? Prof. Josephine E. Tilden, University of Minnesota botanist and leader of a scientific expedition to Japan, Australia and New Zealand to collect marine algae, said at Minneapolis.

"Marine algae," said Prof. Tilden, "are sources of all four of the important vitamins, A, B, C and D." body cried "Hail, Hitler!" What the impostor got out of it is hard, but when he tried to repeat the game at Grunau, Grunau investigated, found there was no such subsidy, and gave the man a long prison term.

### Saw It All Right

Elizabeth Harwood, Cleveland, visited a seeress. She was told "your husband will come back when he's tired of a blond" and "your husband is having trouble with the police." "Yes, sir," the fortune teller continued, "I see iron bars and blue coats. It means jail." It did. Miss Elizabeth Harwood, an unmarried policeman, took the seeress to jail.

### Canadian History

**Record May Be Made Of The First Generation Of British In Canada**  
How are British interest in and knowledge of the Canadian scene to be made more general, as general as is our Canadian interest in Britain?

One help, which will probably have to come from our side of the Atlantic, would be a history of the British in Canada comparable with Francis Parkman's story of the French in Canada up to the conquest. Carlyle demanded that history cease to be a record of kings, courts and battles, affirming that how the common man lived should be its main interest—that history should be the essence of countless biographies. The first generations of the British in Canada left meagre records; they were too busy with doing to have leisure for writing. Gradually, however, the romance of the history of Canada will emerge from the research of scholars and archivists. When Canadian history is rewritten from that material, with a minimum of "constitutional development," it will be a great addition to the literature of Empire.—D. D. Calvin in the London Spectator.

### Estate Of Publisher

**Will Of Adolph S. Ochs Leaves Control Of New York Times To Relatives**

The will of Adolph S. Ochs, leaves control of The New York Times to three relatives and directs that the income from the publisher's residuary estate be divided between his widow and daughter.

The controlling interest in the newspaper, which Ochs built from a foundering daily to a journal of international importance, passes under the terms of the document to Julius Ochs Adler, nephew; Mrs. Iphigene Ochs Sulzberger, daughter, and Arthur Hays Sulzberger, son-in-law.

After making numerous outright bequests to universities, relatives, employees and others, mostly of stock in the New York Times Company, Mr. Ochs directed the income from the rest of his estate between Mrs. Sulzberger, his daughter; and Mrs. Edie W. Ochs, his widow. The will made no estimate of the value of the estate.

### Research Council

**Work Carried On By This Body Is Worth Millions To The Farmers**

With their work estimated at "tens of millions of dollars" in value to farmers, associate committees of the National Research Council ended their seventh annual convention held at Winnipeg.

Dr. H. M. Tory, president of the council, declared in his windup address that the group had as much of Canada's future in its hands as any other body of Canadian citizens. The work was worth millions to farmers, he declared.

Farwell was said to Dr. O. S. Aamodt, University of Alberta, who will shortly join the staff of the University of Wisconsin. Regretting Dr. Aamodt's departure, the council members extended him best wishes in his new work. Tribute to Dr. Tory's work was voiced by Dr. W. C. Murray, president of the University of Saskatchewan.

Sub-committees were re-established and their chairman named.

### Japan's New Ships

**Merchant Marine Fleet Finest Naval Reserve In World**

The Japanese are leaving no stones unturned in their expansion to major world power. Their new merchant marine fleet, the finest naval reserve in the world, is speedily dominating Pacific Ocean shipping. One of six new luxury liners being built by Japan has entered service; a fleet of 50 freighters which travel at speed of more than 20 miles per hour, span Tokyo to San Francisco in 11 days with rich cargoes of silk. This constitutes a tremendous saving in time and dollars.

### Few Get Them

The average woman needs 12 pairs of shoes a year, shoe experts have estimated. They enumerate the kinds as follows: One pair for sports, four street pairs (one for each season), four pairs of formal daytime pumps, and three pairs of evening shoes—for spring, summer, and the fall-winter seasons.

### Little Journeys In Science

#### THE SPECTROSCOPE

(By Gordon H. Guest, M.A.)  
Scientists have shown that the earth and every star which can be observed by the telescope, including the most distant, are composed of the same substances. Of course the proportions are different, but the substances are not.

A glass prism in the hands of the great scientist Sir Isaac Newton in 1672 commenced the train of thought that led to this discovery. Newton observed that the prism split up ordinary sunlight into the various colors of which it is composed. The prism was the beginning of a very powerful instrument of science, namely the spectroscope, which was developed about a hundred years later. It is this instrument that tells us that all the stars and planets are composed of the same materials in different proportions.

The spectroscope sees more than our eyes enable us to see. Man can only observe those substances that give off vibrations to which our eyes are sensitive. The spectroscope is sensitive to all vibrations that matter sends out. We cannot see colorless gases, but the spectroscope can. In fact this instrument can see gases so plainly that it can tell one from another. This is because every solid substance and every kind of gas sends out vibrations, each having a rate of vibration of its own. Science has determined the rates of vibration of all the solids and gases of which the earth is composed. When the same vibrations come from other planets and stars scientists know that they are composed of the same materials that are in the earth.

### Fooled For Second Time

**Suburb Of Germany Wary Of Strangers With Ideas**

Kopenick, the manufacturing suburb of Berlin, Germany, is now wary of strangers with big ideas. For the second time it has been the victim of them. Almost on the heels of the stranger who posed as a Prussian officer, was glorified by the town council, and almost got away with the municipal cash box, another stranger arrived. Loaded with the bogus decorations of a flying officer he approached the Kopenick Air Protection League and persuaded its members to build the finest bomb-and-gas-proof protection cellar in all Germany. He requested the government subsidies. The mayor declared the shelter, children sang, and every-

### Trek Of American Farmers

**Families Of Mid-West Drought Area May Go To Oregon**

Plans for the transfer to the green fields of western Oregon and western Washington of 25,000 families in the mid-west, drought area, were announced at Portland by D. O. Hood, state budget director for Oregon, upon his return from Washington, D.C. The task, he said, will be undertaken by the federal relief administration. It will be under way within a month.

State-owned property in Oregon and Washington will first be taken up, federal money being used for the purchase of property acquired by the federal land banks in the two states will be bought. Hood said the money will come from the \$4,800,000 work relief appropriation.

### Drinking And Driving

**Danish Professors Conclude That These Two Do Not Mix**

Drinking and driving don't mix well concluded two Danish professors, who recently tested the reactions of a group of drivers who had been given the alcoholic equivalent of three nice highballs. Tested by apparatus designed especially to note mental and physical alertness, it was found that the highball squad were 17 per cent slower to react than those persons who had gone thirsty.

Consumption of alcohol, showed the experiments, adversely affected the speed of a driver in applying the foot brake and the strength of his grip on the steering wheel.

### Does Not Want Freedom

Rev. L. D. Stueland for a constant companion on his motor trips about the Wind River Indian reservation in Wyoming a domesticated wild feline. Seven years ago he captured the bird near Castle Rock, Colo. after it had broken a wing. It soon became a household pet and, although free to leave at any time, returns to its cage each night.

### Reflect a Moment!

We put the choicest leaf into Ogden's—just the kind of tobacco you'd select yourself, if you were a tobacco expert carrying out orders to produce the best cigarette tobacco on the market.

Reflect a moment on this and you will see why we are so confident that Ogden's quality will satisfy you—just as it does so many other particular smokers. For the greatest satisfaction, roll Ogden's Fine Cut in "Vogue" or "Chantecler" papers!

### Bank Of Canada

**Will Pay Its First Dividend To Shareholders Next July**

When the Bank of Canada pays its first dividend next July the amount going to each shareholder will be based upon the time the first share instalment was paid, it was learned at Ottawa.

Applicants for shares were required to send their orders for \$12.50 for each share requested, representing one-quarter of the cost per share. Dividends will be reckoned, therefore, on \$12.50 per share from September 1, 1934, to January 2, 1935, and on the full purchase price of \$50.00 per share from January 2 to the date of declaration, probably July 2.

The actual rate of dividend will not be known until it is declared by the board of directors, but under section 31 of the Bank of Canada Act it cannot exceed 4½ per cent a year, cumulative. Any excess profits over the maximum dividend requirements go to the rest fund and the consolidated revenue fund of Canada.

The Detroit Free Press says another admirable thing about the English is that they can view the situation in Europe calmly and discuss it without calling names.

"Should a husband keep anything from his wife?" queries a worried benedict. At least enough we should say, for lunch and car fare.

Why is it that the hair you need falls out and the teeth you don't want have to be pulled.

## Conference Between Government And Grain Exchange Officials In Connection With Garnet Wheat

While no official commitment was entered into, a conference between representatives of the Winnipeg Grain Exchange and the government, in the office of Hon. R. B. Hanson, minister of trade and commerce, proceeded on the assumption that elevator companies will be protected when the separate grading of Garnet wheat becomes effective July 31 next.

The 1934 amendment to the Canada Grain Act excluded Garnet wheat from grades one and two Northern. The exclusion is to date from the opening of the new crop year. There are now said to be between 50,000,000 and 60,000,000 of bushels of grades one and two Northern which contain Garnet. Elevator companies hold this wheat and are obliged to deliver the quantity according to the grades under which it was taken in. If no provision is made for their protection, they will stand to lose heavily for the reason that this wheat will no longer qualify for its original grades.

The time was devoted to a general discussion of how best the change can be brought into effect. It may be that the elevator companies will be compensated for the loss in quality which must result from the exclusion of Garnet from these grades. Or John I. McFarland, acting for the government, may accept delivery of all of it on the old grades and then absorb the loss which will result.

While it is clear that the burden of loss will not be placed on the elevator companies, the conference failed to agree upon a method to be pursued.

The grain exchange was represented by Sidney T. Smith, R. T. Evans and Arthur Darby, secretary. With Mr. Hanson was Rod Finlayson, the law officers of the crown and other government officials. Mr. McFarland was not present.

### Five Major Errors

**Cause Of Motor Fatalities Given By Insurance Company**

What causes motor car fatalities? Violation of certain common rules of the road, which are, or should be, known to all, accounts for most of them.

The Travellers' Insurance Company of the United States in its annual compilation of highway accidents finds drivers guilty of five major errors. Of the 36,000 deaths last year, the report shows, 6,880 were caused by excessive speed, 3,470 by driving on the wrong side of the road, 2,740 by not having right of way, 3,520 by driving off roadway, 2,740 by other reckless driving. Pedestrians erred, too, and are taxed with two major causes in the annual roll of fatalities. 4,310 by crossing streets between intersections and 2,690 by walking on rural highways. These seven causes account for 74 per cent. of the total lives lost.—St. Louis Post-Dispatch.

### Feed Wheat Diverted

**Say Shipments To U.S. From Canada Go To Flour Mills**

United States agents are combing the Midwest in a hunt for wheat bootleggers, according to a Chicago despatch to the Herald Tribune.

"Because of the swirling storms of dust which last year covered meagre forage in pastures," the despatch says, "and increased the death rate of cattle, the duty on wheat was reduced from 42 per cent. to 10 per cent. to permit its importation for feeding purposes. Investigators have discovered large diversions of the feed wheat to flour mills.

"One shipment of 400 tons from Canada, according to customs men, has disappeared somewhere in the region of St. Paul, and its obvious destination has caused investigators to wonder how much Canadian wheat ever reached the cattle for which it was intended."

### Inventor Dies

**Chemist Invented The Cellulose Process For Spinning Artificial Silk**

Charles Frederick Cross, of Sussex, Eng., to whom women are partly indebted for artificial silk hosiery, died recently at the age of 75.

Cross, with a fellow chemist, E. J. Bevan, invented the cellulose process for spinning artificial silk more than 40 years ago. He enjoyed a world-wide reputation among pulp and paper makers and had received many distinctions for his research work.

### Leaks Are Wasteful

If you want to have plenty of hot water at your house, watch your hot water faucets and don't let them drip even a little. New washers cost little and a faucet that leaks even two drops a second can waste more than two gallons of water a day. If the leak becomes even the smallest stream, there may easily go twenty gallons of hot water which you are paying to heat.

An apple tree is in its prime at about 25 years and reaches its "dotage" at about 60, figures an agricultural economist.

### Likes Antarctic Fare

**Lincoln Ellsworth Prefers It To New York Meals**

New York restaurants would please Lincoln Ellsworth better if they served steaming seal steaks or sautéed penguin. "I like the wild taste of such meat," said the explorer, back from Antarctica.

"Seal steak is delicious and the only difficulty with penguin was that it took 17 of them to feed our crew. The breakfasts are the only parts you can eat."

Penguin eggs, too, are not to be snubbed on a polar menu. They are about the size of turkey eggs and fried or in omelets are fit for any explorer's breakfast.

In New York while making up his mind on plans for another try at crossing the southern back yard of the world, Ellsworth is keeping in trim by wrestling daily. Grayling at 54 and tanned as if he had wintered on a Miami beach, he hopes to return to the Antarctic so that early in November or late in October he can attempt another pole-ward dash.

To the "ice wharf" mixed persons of the general public who look askance at polar expeditions, Ellsworth had this to say:

"There are 5,000,000 square miles in the Antarctic—an area equal to that of Europe and Australia, 90 per cent. of which is unexplored. This area must have all the resources of coal, gold and platinum and any other resource found in any other continent. They may be inaccessible to-day but we do not know what to-morrow will bring."

### FASHION FANCIES

799

Ellen Worth offers pattern of this one-piece dress, stitched in box-pleat effect. The belt may be adjusted easily to rapidly growing girls. Style No. 709 is designed for sizes 4, 6, 8 and 10 years. Size 8 requires 2½ yards of 35 inch material with ¾ yard of 35 inch contrasting.

Patterns 20c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

The Spring Fashion Magazine is better than ever. Entirely illustrated in color you will find it a very stimulating fashion edition. There are clothes for cruising and clothes to brighten the lives of stay-at-homes. Many delightful little novelties for the smaller members of the family. Of course, patterns are obtainable for the designs illustrated. Send for your copy to-day, the price is 20 cents.

### Thinkers Are Real Rulers

**Determine Line Along Which Movement Is To Advance**

Behind the invention is the inventor; behind every discovery there is the thinker. The thinker is thus the real ruler of the world. He initiates new ideas, is behind each great advance, and really it is he who determines the line along which mankind is destined to advance. The thinkers are the world's real leaders; we can not say that they are the world's real rulers? The pen is mightier than the sword!

### Oxen Take To Air

And now we have flying oxen. "Red" Lynburner, formerly of Niagara Falls south, Ontario, flew a live ox from Chibougamau to Oskaneana in Quebec last month and plans to transport another shortly. A mining company wanted the beast for rough hauling where there are no roads.

Due to the large amount of pectin contained in Canadian-grown apples, the juice of Canadian apples may be used in other fruits to give a jelly consistency to jams and marmalades. There is no sugar in a good apple, even the paring and the core may be used for jelly.

### Federal Electoral Maps Now Available

**Maps Prepared Showing The Boundaries Of Constituencies**

The preparation of a new set of electoral maps, one of each of the 248 (two being double) federal constituencies throughout Canada as defined by the Representation Act of 1933, which is based on the population shown by the 1931 census, has been completed by the Topographical and Air Survey Bureau, Department of the Interior. The maps were required in order that the information contained in the Act, particularly that with regard to boundaries of constituencies, and the cities, towns, villages, and rural municipalities within each, might be available in simplified, graphic form. These maps were prepared under the direction of Mr. Jules Chastagnay, the chief electoral officer for Canada.

Many difficulties were encountered in visualizing the information embodied in the Representation Act. At the start it was realized that the amount of work entailed in preparing copy and printing hundreds of maps, by the usual methods, made it necessary to adopt some quicker processes as the electoral maps had to be issued as soon as possible. It was decided therefore to adopt the simpler plan of selecting the most suitable base maps available, marking on them the boundaries of constituencies, and having the marked copies reproduced by a photographic process. Blue line copies were then made from the photographic prints, and these blue line copies are the maps now available.

In addition to the individual maps of the various constituencies of every province was prepared, in order of show in convenient form all constituencies within a province. These maps are of course on a smaller scale than those of the individual constituencies, but they indicate the territory included in each sheet. Copies of the maps, by provinces or separate constituencies, may be obtained at a nominal charge upon application to the Surveyor General, Department of the Interior, Ottawa.

### A Good Initiator

**Starling Has No Distinctive Song Of Its Own**

Most of us only know this new bird, the starling, as a pest. When seen alone or in pairs most people mistake them for blackbirds and do not go to the trouble of perceiving that they are not purple grackles, being too small. They are similar in size to robins, but shorter, less stout of body, have smaller heads and longer bills and whiter.

Most of us never observe the starling until in the autumn when these birds gather in their thousands and tens of thousands. They are similar in size to robins, but shorter, less stout of body, have smaller heads and longer bills and whiter.

There is something else about this bird. It is a new song bird in Canada. At this time of year the starling is not a clan bird but an individual. A pair goes away and nests. And a starling, male or female, will sit in a tree and with no particular song of its own will imitate most of our native birds, the robin, the crow, the sparrow and the catbird. The starling will sit in one place and imitate several birds in succession. At times it will sing and while doing so it will clamp its beak as an accompaniment to its song. This bird does wonderful things. It is an artist and if you will stand and watch and listen to it, it will go on indefinitely, letting you hear what it can do. It appreciates your interest. The starling only shows its art in the mating season, but, as a bird expert tells us, that is true of nearly all the birds.—Toronto Star.

### Are In The Majority

**Figures Show More Single Persons In Mental Hospital**

The annual report of the Falconwood provincial sanatorium at Chertsey, P.E.I., for the insane does not go so far as to say that marriage prevents insanity, but it does point out in tellable figures that 527 single persons were admitted to the institution since it was opened compared with 96 married persons. And during the last year the ratio was 44 to 12; while seven widowed persons were admitted.

The report tabled in the legislature is submitted by Dr. A. J. Murchison, medical superintendent, who said that 856 patients were given treatment during the year.

### Queer Chinese Custom

The spectacle of a bride on the way to her wedding ceremony, accompanied by her own coffin aroused the interest of thousands of spectators in the city of China, recently. The bride, a 77-year-old widow, was marrying an 88-year-old farmer, and according to ancient Chinese custom had purchased her coffin years ago. It was her most cherished household possession.

Nearly 40 per cent. of all college graduates have defective sight.

MARS: "Come to my arms and let them babble away." PEACE: "You must first take off your armour, or you'll crush me."

### Origin Of Steam Whistle

**Was First Used On Trains In England In 1833**

The long, eerie howl of a locomotive steam whistle echoing for miles across the plains is quite a step from the tin horns that engineers used to blow when trains first began to run in England.

Bugle-blowing was all right to scare cows off the tracks, but one day in 1833, according to The Rail, a publication of the Chesapeake and Ohio and Pere Marquette Railways, a farmer started across the tracks near Leicester with wagonload of eggs. The engineer hurried and puffed on his little tin horn, but to no avail the eggs got nicely smashed.

After the damage had been duly paid, one of the directors asked George Stephenson, one of the fathers of railroads, to help him remedy the situation. They decided to try to employ the locomotive's steam and "make a noise with it to warn people."

A maker of musical instruments finally constructed an apparatus, which, when blown by steam, let out an awe-inspiring screech. But it was the start of the modern steam whistle, which, although toned down a bit is essentially the same as that being in 1933.

Being a gentleman is simple. You just do the right thing when there's no power to make you do it.

### Unearth Historic "Sea Serpent"

**Skeletons Dug From Clay Beds In Southern Manitoba**

The fossilized remains of the two prehistoric "sea serpents" dug from clay beds northwest of Morden, Manitoba, where they lay buried for an estimated period of 60,000,000 years are in the course of preparation for exhibition in the National Museum, Ottawa.

The larger of the two skeletons is probably the longest of which there is any record, the Department of Mines reports. An excavated measures 35 feet, but a considerable portion of the tail is missing, and its total length probably exceeded 40 feet. The smaller mosasaur skeleton is 15 feet long with a portion of the tail also missing. Combined shipping weights exceed two tons. Discovery of the two skeletons marks the first occasion that any considerable part of the fossilized remains of mosasaurs have been found in Canada, though fragments have been located near Miami, Manitoba, a few miles to the north of the site of the present discoveries.

He: "I have been trying to discover why a woman is so much more curious than a man. Why do you suppose it is, Miss Winnie?" She: "I don't know, I'm sure, I've never been curious enough to inquire!"

## The SNAPSHOT GUILD

More About The Candid Camera

In "candid" photography you must shoot with conditions "as is." That's what makes it fascinating.

Last week we talked about candid photography in general so now let's discuss the personal and mechanical equipment necessary to take candid camera pictures.

First, you must be equipped with a disposition to overcome a few obstacles, for you are going to have them if you are determined to get real candid camera shots. As was pointed out last week, in candid photography you take your pictures "as is."

In candid photography your picture possibilities are limited—or unlimited, as the case may be—by the versatility of your camera, but for the average amateur a small camera with an f3.5 lens will give all the speed necessary. A fast lens plus super sensitive panchromatic film is essential if you are to make your candid camera shots under adverse lighting conditions, in or outdoors. Next in importance is your shutter speed. No, an extremely fast shutter speed is not all-important for candid shots, but obviously it has many advantages.

An ideal combination for your miniature candid camera is an f 3.5 lens for your largest diaphragm opening with shutter speeds ranging from one to 1/800 of a second. With such a shutter you will also find it equipped for "time and bulb" exposures.

Slow shutter speeds are important, for there are occasions when you will find it quite necessary to make your candid shot with the lens wide open and then, to get proper exposure, you'll have to shoot at speeds of 1/10, 1/15 or perhaps a full second. Slow shutter speeds will be found necessary, too, when under good lighting conditions you may want to "stop down" to f16 or f22 to get good depth of focus.

JOHN VAN GUILDER.

## Upward Swing of Cattle Industry Is Indicated By Reports of High Prices Paid For Foundation Stock

### Follow Definite Routes

**Wild Ducks Use Same "Flyways" As Their Ancestors**

Wild ducks migrate along routes followed by their ancestors in four definite geographic regions known as "flyways," according to R. C. Lincoln, naturalist of the U.S. biological survey.

Attention has been drawn to his statements by W. G. Ross, K.C., M.L.A. Moose Jaw, president of the Saskatchewan Fish and Game League.

Result of the discovery that ducks follow four separate flyways each spring and fall means that sportsmen along each route will have to protect their ducks from fellow shooters as the numbers of the birds will not be replenished by ducks from other flyways, according to Mr. Lincoln.

The ducks, he says, are so strongly influenced by their ancestral lanes of migration that they will continue to follow them even though conditions en route or on the wintering grounds become unfavorable.

If the birds should be exterminated in any one of the four major flyways it would be a long time before that region could be repopulated, he says. He states that the undisputed evidence that the waterfowl of North America have seriously decreased in numbers and, accordingly, that special precautions must be taken to prevent their extermination.

The four flyways are known as the Atlantic, the Mississippi, the Central and the Pacific.

### Potatoes For Enslavement

**Experiment To Be Made As To Their Suitability**

For the purpose of preparing and carrying through a detailed program of research on the utilization and marketing of potatoes grown in Canada, an Associate Committee on Potato Research has been appointed, the members of which are officials of the Dominion Department of Agriculture and the National Research Council.

The committee is to inquire into the usefulness of the existing potato for ensilage. Dr. E. S. Archibald, director, Dominion Experimental Farms, has arranged with Dr. E. S. Hopkins to include with the silage experiments this year the ensiling of potatoes alone and mixed with other crops. The silage of potatoes for ensilage, Dr. E. S. Archibald, director, Dominion Experimental Farms, has arranged with Dr. E. S. Hopkins to include with the silage experiments this year the ensiling of potatoes alone and mixed with other crops.

The 1934 potato crop of Canada was estimated at about 80 million bushels which was 10 per cent. greater than that of 1933 and six per cent. above the average production for the five year period 1929-1933.

### Farmers' Creditors Act

**3,200 Settlements Arranged Between Debtor And Creditor**

At the end of last March 40,316 farmers throughout Canada had sought benefits of the Farmers' Creditors Arrangement Act, Quebec leading with 1,819 interviews. It became known that interviews with official receivers in other provinces were: Saskatchewan, 8,778; Alberta, 8,311; Ontario, 5,321; Manitoba, 2,832; Prince Edward Island 1,192; British Columbia, 1,068; New Brunswick, 714, and Nova Scotia, 281.

Finance Minister E. H. Rhodes, discussing the legislation, said: "The figure of 3,200 settlements in Canada in the short operation of this act is the strongest argument that could be used not only for the legislation but for the purpose of convincing everyone as to that element of fairness and honesty which characterizes debtor and creditor alike in this country."

### Would Abandon Lines

**Applications From Railways To Abandon Branch Lines In Five Provinces**

The board of railway commissioners said it has before it 24 applications from the Canadian Pacific Railway for abandonment of branch lines in five provinces, New Brunswick, Quebec, Ontario, Alberta and British Columbia. The Canadian National asked leave to abandon almost 160 miles of branches in Quebec.

Truck competition is no doubt in a great measure responsible for decline in revenue on many branch lines.

The oldest complete skeleton of mankind which science has found to study is that of a Neanderthal woman who lived in Palestine, perhaps 75,000 years ago.

The average plant shoot will grow one inch every 11½ days under normal conditions.

The recent sales of pure bred bulls in Western Canada are being regarded as a definite barometer indicating an upward swing in the livestock industry. Reports reaching the department of agriculture from these sales receive careful study. They were held in Brandon, Regina, Calgary and Edmonton.

The prices paid by ranchers for pure bred bulls indicate the confidence they have in the future of the cattle business since these bulls were bought to improve stock on the ranges. In the sales, and particularly in the Calgary sale, higher prices were paid than in former years. One bull in Calgary brought a top price of \$15,000.

Improved demand for high grade live cattle in the United States is another cause for the demand for pure bred bulls, according to Senator D. E. Riley, a rancher himself and particularly well informed on livestock matters. He regarded favorably many recommendations of the price spreads commission for helping the industry.

A wide demand for grading hogs on the rail is sweeping Canada, according to applications received by the department of agriculture. This is another phase of livestock marketing dealt with in the report although the commission does not take a very definite stand and much has happened since they heard evidence on the subject.

Grading on the rail means grading after the animal has been dressed. This is the practice in Denmark. The practice in Canada has been to grade on the hoof which was the more feasible although admittedly less accurate.

### Ovation For Singers

**Large Sum Paid Men Who Would Lead Applause**

They number about 40 men, mostly Italian. They band together in New York whenever Manhattan's Metropolitan Opera gives a performance. They have no tickets and they need none. A leader passes them in, huggemurger, at the 39th street entrance before the carriage trade arrives. Inside, they station themselves on either side of the house, near the stage as possible. Perhaps 15 climb to the tip-top gallery. Upstairs or downstairs their job is the same—lead applause.

The horny-pated gentlemen of the Claque are worried for the winter is that they would no longer be wanted after Herbert Witherspoon takes command at the Metropolitan. The Metropolitan management had nothing to say, for it has never officially acknowledged its professional clappers. Their leader, one Harold Lodovichetti, was once a waiter. Having inherited his job from his father, Claqueur Lodovichetti he has trained his men not only to promote enthusiasm at the right time but also to curb it. An inexperienced opera-goer gets a resounding hiss if he applauds at a wrong moment. If the Claque happens to be standing behind him, he may be fairly deafened when the cued moment comes.

The Metropolitan pays its Claque nothing but the singers may buy special service. Caruso rarely sang without a Claque. Gigli had his and Marcellini's top notes still bring cheers from the men at the rail. In the old days singers were known to pay as high as \$1,000 for an evening's "success." Now \$25 will buy a fairly noisy ovation.—Time.

### Became A Boomerang

**French Destroyer's Crew Had Queer Experience With Torpedo**

While practicing off the port of Brest a French destroyer fired a torpedo which became a boomerang. Instead of pursuing its course to an innocent end it was impelled by some mechanical flaw to turn round and head for its parent destroyer. It was not carrying a destructive charge so that the physical damage was nil, but the officers of the vessel had to put back to port to recover from the experience.

With regard to the excellence of quality of Canadian ducks seen on Smithfield market London, England, mentioned in the London Fish Trades Gazette advises show that the large duck farm, Eastern Townships, Quebec whence the ducks came, is purchasing 35,000 export tags and is starting packing for export in the near future. The farm expects to double its shipments to England this year.

He: "You know, you're not a bad-looking sort of a girl." She: "Oh, you'd say so even if you didn't think so."

He: "Well, we're square then. You'd think so even if I didn't say so."

Hamelin, Germany, of Pled Piper fame, is said to have the first non-poisonous illuminating gas supply in the world.

### ST. ANDREW'S UNITED CHURCH

Rev. R. B. Layton, Minister  
Mr. L. D. Wright, Musical Director  
Services at 11 a.m. and 7:30 p.m.  
Sunday School at 11 a.m.  
The W.M.S. meets on Tuesday at 3 p.m. at the home of Mrs. A. R. McFadden.

The Mission Band Meets on Sunday morning after service.  
A Debate will be held in the Church on May 24th between members of North Hill, Calgary, Y.P.S. This is in connection with the Provincial Conference. Lacombe citizens are asked to keep this night free from engagements, so as to support our local boys in their debate. Messrs. Don McFadden and Roger Thompson will represent Lacombe.

On June ninth the Tenth Anniversary of the Union of three denominations in Canada will be observed throughout Canada. A special program has been prepared, and it will be used in Lacombe. A Celebration Committee has been formed, and arrangements are being made to have every one connected with the United Church ready for the occasion.

All the United Church ministers of Lacombe Presbytery expect to attend the Annual Conference at Calgary, the work of which begins on Monday. The formal opening takes place on Wednesday night in Central Church. The closing will like take place on Monday, May 27th. Requests for favorite hymns to be sung at Song-Service, May 26th, will be welcomed by Choir.
